Travis Walton's Harrowing Account of Being Abducted by Aliens

On November 5, 1975, Travis Walton was working with a logging crew in the Apache-Sitgreaves National Forest in Arizona when he disappeared. Five days later, he was found wandering along a highway, dazed and confused. He claimed that he had been abducted by aliens.

Walton's story is one of the most well-documented cases of alien abduction in history. He underwent multiple hypnosis sessions, and his story was corroborated by his fellow loggers. In 1978, he published his account of the abduction in the book *Fire in the Sky*.

Fire in the Sky is a gripping and unforgettable story. Walton's account of his abduction is both terrifying and fascinating. He describes being taken aboard an alien spacecraft, where he was subjected to a series of medical examinations. He also claims to have seen other humans on the spacecraft, who were being held captive.

Walton's story has been met with skepticism by some, but it has also been praised by many as a credible account of an alien abduction. In a new foreword to the book, John E. Mack, M.D., writes that "*Fire in the Sky* is a profoundly important book that deserves to be read by anyone who is

interested in the UFO phenomenon." Mack is a Pulitzer Prize-winning author and former professor of psychiatry at Harvard Medical School. He is one of the world's leading authorities on UFOs and alien abductions.

Whether or not you believe Walton's story, *Fire in the Sky* is a captivating read. It is a story of fear, hope, and the search for truth. It is a story that will stay with you long after you finish reading it.
